

HONEYWELL SALISBURY ELECTRIGRIP™ DIELECTRIC BOOTS SIZING CHART

These helpful instructions will ensure that the correct size boot has been selected for all day comfort and performance.

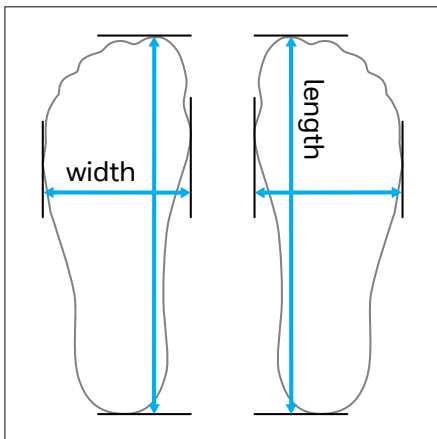

Step 1:

Put on the socks that will be worn with your Electrigrip boots. It is recommended that measurements be taken at the end of the day when the foot is at its widest point.

Step 2:

Trace an outline of each foot onto a sheet of paper. Do not angle the writing instrument, as that may alter the measurement.

Step 3:

Measure the longest and widest parts of each foot outline.

Step 4:

Using the sizing chart, select the size that is the closest size above your largest foot measurement.
